For tracts outside the surveyed area the figures are mostly based on estimates framed in the best manner possible

Column 1.—No areas are now classed as *zamin-dari*, as no system of communal assessment prevails

Column 3 (a) includes special grants which are not yet fully assessed

Column 3 (b) includes old grants exempt from the payment of revenue under special terms

Column 4 (a) states the areas of occupied lands, cultivated or left fallow; it also includes the areas of waste land grants of which the rates have been fixed in perpetuity

Column 4 (b) excludes current fallows

Column 5 shows ordinary land revenue, rents of fisheries, and the items under "Miscellaneous Land Revenue," appearing in the Civil Accounts

Column 1—Raiyatwari includes, besides raiyatwari tenures, all unsettled Government waste and forest lands and areas in which house-tax or poll-tax is levied; it also includes certain temporarily settled estates in Sylhet which were formerly (before 1902-03) included under Zamindari (temporarily settled). Zamindari (temporarily settled) includes, besides temporarily settled Zamindari estates, fee-simple grants wholly or partially revenue-free tenures, and grants under progressive assessment.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Notes—It is optional with local Governments to enter or omit transfers of lands held by tenants. The entries under "by order of court" state not merely the transfers occasioned by debt, but all forms of transfer effected through the medium of a court. The word "court" in the entry "by order of court" should be held to include a revenue court. Changes of entry due to succession, partitions, or simple mortgages, are not really transfers, and are excluded from the table, as also are redemptions of mortgage. All temporary transfers such as leases are also excluded, but mortgage with possession is treated as a transfer and entered in the table.

(a) No transfers

(b) The statement includes all legal transfers of property (1) by voluntary action of the owners and (2) by virtue of decrees of civil, and orders of revenue, courts. Transfers ordered by courts in cases of disputed succession, and those occasioned by debt incurred by the judgment-debtors, are included under the heading "by order of court." This heading also includes transfers ordered by civil courts from registered holders to decree-holders, of lands sold by civil courts in satisfaction of decrees, and of holdings sold by the revenue authorities for arrears of revenue

(c) Transfers of property in land are not permitted in Manpur, except by sale and that only under special conditions.

*Note*—Only permanent transfers, as by sale or gift, are included, when the parties concerned apply for and obtain transfers of revenue registry. These are entered under "private contract or gift." Cases in which lands are sold for arrears of revenue due to Government are also included if the lands are purchased by private parties, but excluded if the lands are purchased by Government. Transfers of tenant-right are not entered, the information not being available. The entry under the head "revenue-paying" includes raiyatwari holdings paying full assessment, and permanently-settled estates paying *peshkash*; and the entry under the head "wholly or partially revenue-free" relates to minor ināms and whole inām villages. The table has been discontinued from 1913-14

Note.—Transfers by inheritance or non-permanent transfers, such as leases or usufructuary mortgages for short periods, are excluded, but mortgages with possession are included, as also all transfers made under order of a court. Transfers of *malikana* rights, that is, rights to receive a portion of the profits of an estate not amounting to proprietary rights, have been excluded. Statistics of transfers of tenant-right are not given. Transfers by gift have been included.

Note.—The figures against "proprietors" are filled up from returns compiled on the basis of mutation proceedings. Those against "tenants" are based on statements furnished by patwaris in which all transfers are entered, including transfers by mortgage with possession as well as transfers by sale, but excluding transfers by inheritance. The statement does not include leases or mortgages without possession.

*Note.*—The information is obtained from the Registration Department. — The table includes all transfers effected by sale of fields under decree of a court (including a revenue court) either in execution of the decree or for recovery of arrears of land revenue. Private sales or recognised divisions of fields necessitating a change in the name of the registered occupant are entered under "by private contract or gift," as also are mortgages with possession. Transfers due to succession, by inheritance, simple mortgages, and leases are omitted.

## APPENDIX A

*Average yield in pounds per acre of the principal cultivated crops, revised with reference to the results of experiments made up to the year 1911-12.*

A provisional return of the yield of the principal crops cultivated in India was first compiled in 1892, from various statistical publications, such as, agricultural and settlement reports, crop forecasts, gazetteers, replies to the enquiries of the Famine Commission, etc., and to provide for the periodical revision of the estimates a system of experimental crop cuttings was prescribed by the Government of India, the results of which were to be reported in quinquennial returns.

The instructions for the preparation of these returns are that the estimate given should be that of the average outturn on average soil in a year of average character as deduced from a consideration of the information obtained or experiments made during the years under review ; so that when multiplied by the average area cropped, it may give as near an approximation as possible to the outturn of the crop in an average year. The Agricultural Department of each Province has at its disposal a provisional estimate of the average yield of land of average quality (under the two major heads of irrigated and unirrigated land) for the several crops in each district. The object of the experiments annually made is to test the accuracy of these estimates, and to enable the head of the Agricultural Department in each province to revise his provincial estimates when necessary. Should it happen that the period has been one of unfavourable conditions which have affected the experiments reported, this would not necessarily involve the reduction of the standard estimates for the district or for the province, unless there were other reasons for thinking that, as estimates of yield in average years, they had been pitched too high.

As a result of the experiments made during the preceding quinquennium (1901-02 to 1906-07), considerable modification of the standard averages for several of the crops was made in all the provinces except Bombay and Bengal. Some three or four provinces have made a few revisions of this character on the results of the experiments conducted in the quinquennium 1907-08 to 1911-12 ; but, on the whole, the distrust in the results of the experiments as conducted by the district staff, to which expression was given by Bombay and Bengal on the last occasion, is growing. In the Bombay Presidency a system of more scientifically conducted experiments by officers of the Agricultural Department has been substituted for the system of experiments conducted by the district staff. In the Punjab and Sind the estimates framed by settlement officers at the time of revenue settlement have been preferred where these are available, while in certain other provinces the figures of the settlement officers have been freely referred to in checking the averages. In Bengal and Bihar and Orissa, though no change has been made in the system, the results of experiments made during the last twenty years have not been considered sufficiently reliable to justify any material change in the provisional estimates framed in 1892. In Burma the system has been condemned ; but the provincial authorities do not consider any change feasible for the present. [Instructions have since been issued by the Government of India for improving these returns and employing the agency of the Agricultural Department for the investigation of average crop outturns as far as possible, in all provinces.]

The leading features in the different provinces are stated in the following paragraphs :—

*Bengal.*—Owing to the administrative changes of 1912, by which Bihar and Orissa have been formed into a separate province, certain crops, which are important in that area but hardly grown at all in Bengal as now constituted, have been omitted from the present report. The results of the experiments made in the quinquennium under review do not warrant any general conclusions as to the average yields of the various crops, nor do they, except in the case of rice, sugarcane, and jute, afford grounds for modifying the provisional estimates hitherto adopted by the Agricultural Department (which are practically a reproduction of the estimates of 1892). The average yield of winter rice has been reduced from 1,234 lbs to 983 lbs ; on the other hand, the yield of sugarcane has been raised from 2,460 lbs to 2,905 lbs and that of jute from 1,200 lbs (3 bales) to 1,271 lbs (3·1 bales). In the consolidated tables for British India, the provisional estimates therefore continue to appear with these modifications in the statement of provincial averages, but in the detailed table the average outturn based upon the experiments of the quinquennial period under review is shown for each district.

*Madras.*—The experiments accepted as unobjectionable during the quinquennium were 3,385 in number as against 3,348 in the previous quinquennium. The average assessment of the plots of land selected for experiment is in excess of the average assessment of the province ; in many cases, therefore, the land selected is apparently superior to average class of land. The yield of the majority of crops has been raised, especially in the case of cotton and irrigated jawar : the yield of irrigated cotton has been raised from 66 lbs to 87 lbs and of unirrigated cotton from 44 lbs to 55 lbs., and of irrigated jawar from 1,118 lbs to 1,379 lbs. The only decreases relate to sesamum and unirrigated rice. The reported yield of paddy (unhusked rice) has been reduced by 38 per cent to obtain the yield of rice (husked).

*Bombay.*—The estimates of 1897 were prepared with great care and the results of the experiments made in the two quinquennia ending 1901-02 and 1906-07 were not considered sufficiently reliable to justify any revision. With the sanction of the Government of India, the system of crop cutting experiments conducted by the district staff was abolished in the quinquennium under review, and a system of more scientifically conducted experiments on Government farms by the officers of the Agricultural Department was substituted. But the results as yet obtained from the experiments on Government farms are too meagre to justify a general revision of the estimates. A few changes considered to be necessary by the Provincial Director have, however, been made with great caution in the figures for certain districts.

*Sind.*—In many cases figures taken from the previous report have been repeated, while in several instances figures have been taken from the settlement reports. Of the experiments selected as giving results typical of an average crop during the present quinquennium three were on wheat, one on jawar, two on bajra, one on gram, and one on cotton. As a result, the provincial average has been raised in the case of wheat, jawar, bajra, gram, rapeseed and cotton, while it has been reduced in the case of sesamum; the most important changes being the increase of the average yield of cotton from 303 lbs to 380 lbs, and that of bajra from 776 lbs to 971 lbs.

*United Provinces.*—The experiments made during the quinquennium under review have not necessitated any change in the provincial averages except for rice and maize. The yield of rice has been raised from 850 lbs to 900 lbs and that of maize from 1,050 lbs to 1,100 lbs.

*Bihar and Orissa.*—The present return relates to the province of Bihar and Orissa as constituted in 1912. Owing to carelessness in the selection of representative fields and to various other defects in the conduct of the experiments made in the quinquennium under review, the results arrived at do not afford any reliable information or justify any modification of the provisional estimates previously adopted by the Agricultural Department of the old province of Bengal on the basis of the estimates of 1892. In the consolidated tables for British India, these unrevised provisional estimates have therefore been retained in the statement of provincial averages, but in the detailed statement of district figures the average outturn based upon the experiments conducted during the quinquennium under review has been shown for each district, irrigated and unirrigated crops being classified separately.

*Punjab.*—The revisions of 1902 and 1907 were made on the basis of very unscientifically selected and inadequately supervised experiments carried out by the district staff without reference to the very careful estimates framed by the settlement officers at the time of revenue settlement. The present revision has been made in consultation with settlement officers in the case of districts of which the settlement is in the early stages, while in other cases the average yield has been worked out mainly from the areas and yields given in the assessment reports, and where the results differed materially from the yields fixed in 1907 without any change in agricultural conditions having taken place, the settlement officers' estimates have been preferred. There is no doubt that the yields now fixed, based as they are on the over-cautious estimates of settlement officers, are too low, but they are at any rate placed on a uniform basis. The result of the revision is a reduction of the yields of all the crops except rapeseed and sugarcane the averages for which have been raised. The most important changes are the reduction of the yield of bajra from 462 lbs to 379 lbs and of that of gram from 701 lbs to 549 lbs, and the increase of the yield of rapeseed from 254 lbs to 396 lbs.

*Burma.*—The number of experiments made in the quinquennium ending 1911-12 was on the whole larger than in the previous quinquennium, and, as in the past, the majority of the experiments were conducted by sub-divisional and township officers. The Provincial Director of Agriculture remarks that this arrangement is far from satisfactory, that the improvement of the system was considered, but that no change appears to be feasible for the present. In order to show the main product only, the following deductions have been made from the gross outturn of the crops, namely, for rice and jawar 33 per cent, and for cotton 70 per cent. The estimates of average outturn of rice, wheat, jawar, and gram have been lowered while those of cotton and sesamum have been raised. The figures for the pea crop now discriminate between *Pegyi* (*Dolichos lablab*) and *Pegya* (*Phaseolus lunatus*) which are the most important varieties exported.

*Central Provinces and Berar.*—Experiments have been selected with greater care in the present quinquennium than in the past, and due attention has been given to seasonal peculiarities and to classes of soil. The average yield has been raised in the case of rice, jawar, gram, linseed, and sugarcane, and lowered in the case of sesamum and cotton. In order to show the yield of the main product a deduction of 38 per cent has been made in the case of rice and of 70 per cent in the case of cotton.

*Assam.*—In the previous quinquennium figures for Assam were not shown separately, but they were combined with those for the districts of Eastern Bengal to give the average for the province of Eastern Bengal and Assam. The present return has been prepared for the province of Assam since its re-constitution on 1st April 1912. Detailed figures for each district are not available except for winter rice, rape and mustard, sugarcane, and cotton; these show a general increase over the previous estimates. In the case of cotton a deduction varying between 50 and 60 per cent has been made to obtain the yield of cleaned cotton. In almost all districts the number of experiments conducted during the period under review fell short of that made in any of the previous periods. The results, however, are stated to have been generally

reliable and to have tallied for the most part with the estimates made by settlement officers in some of the districts where important settlement operations were in progress.

*North-West Frontier Province.*—In the five years under review experiments were made by the district staff in only two districts, and the figures for those districts have been checked and modified where necessary on the basis of those experiments. For the other districts the averages previously adopted on the basis of estimates framed by settlement officers have been repeated. The Provincial averages have been raised slightly for all the crops except maize for which the figure has been reduced from 1,342 lbs to 1,292 lbs.

*Ajmer-Merwara.*—The figures reported appear to be merely averages of the results of the experiments conducted during the five years of the period without any consideration as to whether any of those years was of an average character or not. The yield of barley, maize, and cotton has been raised and that of jawar lowered, the most important change being the reduction of the yield of jawar from 424 lbs to 137 lbs. A reduction of 70 per cent has been made, as before, to obtain the yield of cleaned cotton.

*Coorg.*—The only experiments made have as usual been on rice. The average yield has been lowered from 1,507 lbs to 1,483 lbs, which is still very high in comparison with the reported yield of other provinces, but is ascribed partly to increased attention being paid to rice cultivation since the decline of the coffee industry and partly to the rice lands of Coorg being watered by hill streams which contain much manurial matter. [From experiments since made the average outturn comes to 1,316 lbs.]

*Mysore.*—The rainfall in the quinquennium under review is stated to have been generally erratic. The average yield of rice has been reduced from 879 lbs to 841 lbs, of sesamum from 215 lbs to 199 lbs, of sugarcane from 3,279 lbs to 3,138 lbs and of cotton from 89 lbs to 79 lbs, while that of ragi has been raised from 562 lbs to 581 lbs, and of horse gram from 229 lbs to 257 lbs.

NOTE.—The average yield of both irrigated and unirrigated land is ascertained by multiplying the yield of irrigated land by the irrigated area cropped, and that of unirrigated land by the unirrigated area cropped, and dividing the sum of these two products by the total area cropped

\* The estimates for Bihar and Orissa are the standards, adopted provisionally by the Agricultural Department of the province, which are partly based on the information collected in 1892. The results of the experiments for the period ending 1911-12, regarded in Appendix A—No. 6, are not considered sufficiently reliable to justify a revision of the provisional estimates

# Agricultural Statistics of India

1913-14

## VOLUME II—NATIVE STATES

### Report

To

THE SECRETARY TO THE GOVERNMENT OF INDIA,  
DEPARTMENT OF REVENUE AND AGRICULTURE.

SIR,

I have the honour to submit the second volume of Agricultural Statistics for 1913-14. They deal with the Agricultural Statistics of Native States as far as reported. As in the previous issue, summary tables have been inserted to show the total figures relating to area, the classification of area, and the area under crops for each State or group of States and the totals for all the reporting States. Explanatory notes have been inserted at the foot of the tables. Two charts and an index for easy reference have been added to the volume. It should be noted that, for reasons explained below, the Agricultural Statistics of Native States are incomplete and are of far less accuracy than are those of British Provinces published in volume I.

The statistics are compiled from annual returns furnished by the State Durbars through the political officers. Information, so far as available, regarding the sources from which the figures are collected in the different States is given in the footnotes to the respective tables for each State. The statistics consist of six separate tables, namely, I—Area; II—Classification of area; III—Area under crops; IV—Live stock, ploughs, and carts; V—Land Revenue Assessment; and VI—Transfers of property in land. The totals of the figures given in tables I, II, and III are shown in a series of summary tables. The totals of tables IV, V, and VI are not shown in the summary tables, as they are very incomplete, owing to the absence of returns from a number of States. In addition to these tables there is an appendix which gives the meaning of vernacular terms used in the volume.

The total area of Native States in India is some 497,000,000 acres (777,000 square miles), with a population of 72 millions according to the census of 1911. These are divided for purposes of Agricultural Statistics into two main classes, namely, (1) States under the control of Local Governments and Administrations, and (2) States having direct political relations with the Government of India.

(1) *States under the control of Local Governments and Administrations.*—The total area of these States is 180,690,000 acres, with a population of some 27 millions. They are divided into the following main groups:—

|                                                | Area<br>Thousand Acres | Population<br>Thousands |

It will thus be seen that owing to this gradual increase in the number of reporting States, the statistics for the year of report (1913-14) are strictly comparable only with those of the immediately preceding three years, namely, 1910-11, 1911-12, and 1912-13. It may be noted here that arrangements are being made by His Highness the Nizam's Government to prepare agricultural statistics for the Hyderabad State. The statistics for this State, when prepared will fill the biggest gap in the Agricultural Statistics of Native States in India.

The period covered by this volume is the quinquennium ending 1913-14. The returns for the different States, however, relate to the years ending the dates

stated below, so far as information is now available :—

Table I,  
Total area.

From the total area of all the forty-six reporting States (188,385,000 acres), deduction must be made for 106,489,000 acres for which statistics are not available. These comprise chiefly unsurveyed areas and lands held on jagir, muafi, and other privileged tenures. The net area actually covered by these statistics is, therefore, only 81,896,000 acres by professional survey,\* or 82,449,000 acres according to village papers.\*

uses other than agriculture, amounts to 20,124,000 acres or about 25 per cent. The balance, 52,299,000 acres, or 63 per cent, represents the area available for cultivation. Of this, 16,033,000 acres, or 19 per cent of the total area, represent culturable waste, *i.e.*, land available for cultivation but not taken up, and 7,508,000 acres, or 9 per cent, were kept fallow in the year under report. The net area actually cropped in the year was thus 28,758,000 acres, or 35 per cent of the total area, as against 30,397,000 acres in the preceding year. This net cropped area (28,758,000 acres), however, excludes areas cropped more than once in the year. If areas cropped more than once are taken as separate areas for each crop, the gross area cropped in the year of report amounts to 30,646,000 acres as against 32,513,000 acres in the preceding year.

Irrigation.

The total area irrigated in the reporting States in 1913-14 was 5,736,000 acres as against 5,933,000 acres in the preceding year. Of this, 1,931,000 acres were irrigated from Government canals, 632,000 acres from private canals, 832,000 acres from tanks, 1,267,000 acres from wells, and the remaining 1,074,000 acres from other sources of irrigation. These figures, however, do not take into account areas cropped more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. If areas cropped more than once are counted as separate areas for each crop, the gross area of irrigated crops amounts to 6,300,000 acres, against 6,408,000 acres in the preceding year. Of this area, 5,400,000 acres, or 86 per cent, were under food crops and 900,000 acres or 14 per cent under non-food crops.

The different classes of crops and the area occupied by each, so far as details are available, are stated in the margin. Of the total cropped area, food crops occupied about 24,554,000 acres or 82 per cent and non-food crops about 5,532,000 acres or 18 per cent. Of the food-crops, food grains (cereals and pulses) occupied as much as 22,715,000 acres or about 76 per cent of the total cropped area, and other food crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food crops) together occupied some 1,839,000 acres or only 6 per cent of the total. crops, oilseeds occupied 1,694,000 acres or 5·6 per cent of the total cropped area, fibres such as cotton, hemp, etc., occupied 1,847,000 acres or 6·1 per cent of the total, and fodder crops occupied 1,369,000 acres or 4·6 per cent. The other non-food crops—dyes, drugs and narcotics (tobacco, tea, coffee, opium, etc.), and miscellaneous non-food crops—together occupied some 622,000 acres or 2·1 per cent of the total.

The area under food grains (22,715,000 acres) showed a net decrease of 1,774,000 acres or 7 per cent as compared with the preceding year. The

actual increase or decrease under each kind of grain is stated in the marginal table.

It will be seen that only rice and jawar showed an aggregate increase of 85,000 acres, while all the other food grains showed an aggregate decrease of 1,859,000 acres.

Oilseeds (linseed, sesamum, rapeseed, mustard, etc.) showed a decrease of 357,000 acres or 17 per cent. The area under condiments and spices decreased by 33,000 acres or 13 per cent and that under drugs and narcotics by 64,000 acres or 22 per cent. On the other hand, the area under sugar increased by 1,000 acres, that under fibres (cotton, hemp, etc.) by 313,000 acres or 20 per cent, and that under fruits and vegetables by 90,000 acres or 18 per cent.

The total extent of land on which more than one crop was raised during the year was 1,888,000 acres as against 2,116,000 acres in the preceding year.

Tables IV, V, and VI are very incomplete, as figures for these tables are not furnished by many of the reporting States. Table IV is prepared by only eighteen States, namely, Mysore, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Nagod, Bikaner, Marwar, Jaipur, Kishangarh, Alwar, Bharatpur, Jhalawar, Tonk, and Kotah. According to the latest statistics, the total number of live-stock of the bovine class (bulls and bullocks, cows, buffaloes, and calves) in these eighteen States is 14,012,000, that of the ovine class (sheep and goats) 8,307,000, and that of horses and ponies, mules and donkeys, and camels 411,000. The numbers of ploughs and carts are 1,874,000 and 528,000, respectively.

Table V (Land revenue) is prepared by sixteen States, namely, Mysore, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Bikaner, Marwar, Jaipur, Alwar, Bharatpur, Jhalawar, Tonk, and Kotah; and Table VI (Transfers of land) is prepared by only four States, namely, Mysore, Cochin, Barwani, and Alwar.

The Appendix explains vernacular terms used in this volume, and the charts illustrate (1) the classification of the total area showing the proportion of cultivated and uncultivated lands, and (2) the total area cropped in 1913-14 with shares of food and non-food crops.

I have the honour to be,

Sir,

Your most obedient Servant,

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding Departments in Southern India. In States where there has been no professional survey, the figures are based on the best information available.

Column 3.—In this column is deducted the entire area for which the statistics required for Tables II and III are not forthcoming in whole or in part. This area comprises chiefly estates held on privileged tenures which have not yet been surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that entered in the next columns (4 and 5) and dealt with in Tables II and III is correspondingly increased.

Columns 4 and 5.—Column 4 is a check on the accuracy of column 5. In the latter, "village papers" means "the papers prepared by the village accountants." In States where no village papers exist, or where the source of information is the same for both the survey and the village papers, the figures in column 4 are necessarily repeated in column 5. The area in village papers may differ somewhat from that given by the Survey Department, (a) because, while the survey area is calculated in block, the area by village papers represents the added total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads is not always uniform in the two sets of returns.

(a) The statistics collected in 1908-09 have been repeated for 1909-10, 1910-11, and 1911-12, as information could not be collected owing to pressure of work connected with the revenue settlement of the State.

(b) Previous year's figure repeated.

(c) Column 3 states the area of unsurveyed forests.

See explanations given in the footnotes (page 6)

- (a) Column 2 states the area of the State as ascertained by revenue survey. Column 3 states the entire area of jagir villages
- (b) Column 2 excludes forest areas, the area of forest villages managed by the Forest Department, and about 6,980 acres of 6 unsettled jagir villages
- (c) Column 3 states the areas of jagir and other alienated lands
- (d) Column 2.—As there has been no revenue survey so far, this column states the area of the State according to the best information available. Column 3 states the areas of jagir and muafi villages, the boundaries of which have been demarcated, but for which the statistics required for other tables are not available. Columns 4 and 5.—In the absence of any revenue survey data, the figures in column 5 are repeated in column 4
- (e) Returns for 1910-11 having not been received, the figures for 1909-10 have been repeated

(a) Column 2 states the area of the State according to Settlement records

(b) Statistics are furnished by eleven States of this group, namely, Basbahr, Jubbal, Theog, Kumharsain, Khaneti, Bilaspur, Baghal, Ghund, Mehlog, Baghat, and Madhan, the last two but one from 1910-11 and the last one from 1911-12. They represent about 86 per cent of the aggregate area of all the States comprised in the group. The returns, however, relate only to the settled portions of the reporting States, except Bilaspur, Baghal, and Mehlog for which complete returns have been received. Column 2 states the area of the settled portions of the States named above, except Bilaspur, Baghal, and Mehlog for which the whole area is included

(a) Column 2 states the area of the State as ascertained by revenue survey. Column 3 exhibits the area of jodi, kayam-gutta and sarvamanayam villages, and jagirs for which the statistics required for the other tables are not available at present. Column 5.—The figures in column 4 are repeated

(b) Column 3 states the estimated areas of jagir, muafi, ubari, tanka, istamrar and such other villages as are still unsurveyed

(c) Column 2 states the whole area of the State excluding the areas covered by the Indore Residency, the Mhow Cantonment and the Hrapur Thakurate. Column 3 states the areas of jagir, istamrar and forest villages, and also of some of the outbandi villages

(d) Column 3 states the areas of jagir and such other villages as are still unsurveyed; it also includes the areas which formerly were parts of jagir villages, but which, after the completion of the settlement operations, either lapsed to or were resumed by the State

(e) Column 3 states the areas of jagir and such other villages as are still unsurveyed. It also includes the area of those khalsa villages which have not yet been regularly assessed; these are chiefly the latest acquisition to khalsa under the law of escheat. Columns 4 and 5.—The area by village papers does not differ from the area by survey, for, although differences occur under the different classes of soil, the total area of each village is the same in both cases

Column 2.—The definition of the term "forests" is as follows:—"Any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped), an explanation being given in a note

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads or otherwise appropriated to uses other than agriculture

Column 4 includes groves not classed in the cropped area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column

Columns 8 to 13 state the area actually irrigated during the year, areas cropped more than once being counted once only

(a) See note (a) on page 6

(b) Column 2 states the area of reserved forests within surveyed villages

(c) Column 2 states the areas of forests left unassessed. Forests in this State having not been demarcated, figures in columns 3 and 4 also include same forest areas. Column 4 states areas of land left uncultivated for over three years, of *bir* (grass lands) and of pasture lands. Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is three years

(d) Includes 8,215 acres in coffee estates

Column 2 states the areas of State and district forests and of plantations.

Column 3 includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.

Column 4 states unoccupied assessed waste.

Column 5.—There is no system of fallows, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is taken as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture; but the exact area of all such lands cannot be ascertained, though it cannot be large.

(a) Included in column 3

*Bharatpur*—Column 2 includes grass preserves (locally called the State *Rundhs*) and hills. Column 4 includes areas out of cultivation or which have not been cultivated for the last four years or upwards, but excludes State grass preserves (*Rundhs*). Column 5—the maximum period for which land thrown out of cultivation is reckoned as fallow is three years. Column 8 includes area irrigated from the Bareta Bund, constructed by the State Public Works Department

Note—In this table are entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by higher authorities

(a) See note on page 47

(b) The areas under mixed crops are shown under the principal crop, as it is not possible to differentiate the areas of the respective crops

Note.—Animals in towns, cities, and cantonments are included where it is possible to secure their enumeration. Oxen and buffaloes not old enough for work or to produce young are classed as "young stock".

(a) A cattle census is taken by the patwaris every year after the kharif crop inspection in November. Animals in towns are included.

(b) Enumeration of live-stock is taken by the patwari every year.

(c) Animals in cities and towns are not included.

Note.—Until 1898-99 statistics were collected every year by the shanbog and patel of each village by enquiry or inspection. Since that year a census is taken every five years as nearly as possible simultaneously throughout the State. The last census was taken in January 1911. Stock in municipalities has been included since 1896-97

**Entry 2 (a).**—Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population, head 10. Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

**Entry 3.**—This column should be sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste.

**Entry 4.**—Where land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payments due by the zamindars to Government, not those by the raiyats to the zamindars. The actual realisable demand on account of the year should be entered, after excluding arrears for past years. This column should include all the heads classed as "Land Revenue" in the Civil Accounts.

**Entry 5.**—The population in entry 5 is that of the last general census.

†Narsingarh.—Item 1 states the net area by revenue survey as shown in column 4 of Table I. Item 2 (a) includes forest areas (column 2 of table II) and unculturable (column 3 of table II) and culturable land not possessed by any cultivator. Item 2 (b) states the area of minor muafis. Item 3 (b) includes fallow lands left uncultivated for three years or less as full cultivation rate is assessed on them.

\* These are *khalsa* or state lands only. The whole area of the State according to the census of 1901 is stated in Table I No. 5

† Not reported

\*\* *Alwar*.—The classes of tenure are zamindari and village communities, the former comprising *zamindari-bil-ijmal* and the latter *pattidari* and *bhaiyachara*. Item 1 states the area by village papers (column 5 of table I). Item 2 (a) shows areas covered with forests (column 2 of table II) which are wholly revenue-free.†† *Jhalawar*.—The whole area stated in this table is classed as "Khatedari," and "Watendari" equivalent to "raiyyatwari" and "zamindari," respectively. Item 1 excludes entire villages held by jagirdars and udakdars.

Column 4 (b) states not only the area actually under crops, but also fallow lands as revenue rates are assessed on the total cultivated area, including fallows. Hence the area stated in this column exceeds the total area in table III

Columns 5 and 6 relate only to Khalsa area, as statistics for these columns are not available for the whole area of the State

Column 1.—The State area leased to cultivators for a fixed term is returned as *raiayatwari*. The area leased out on condition of proprietary rights being given to lessees if they reclaimed land within a fixed term is returned as *zamindari—temporarily settled*; and the rest of the area (i.e., the area remaining after deduction of the *raiayatwari* and the temporarily-settled *zamindari* areas from the total area), is entered as *zamindari—permanently settled*.

Column 3 includes muafi, chauth, and istimrar areas

Column 6.—The population stated is that of the last census

Column 11 shows the total population in cases where separate figures for areas fully and not fully assessed are not available

*Note.*—It is optional with the local authorities to enter or omit transfers of lands held by tenants. The following rules have been prescribed for the preparation of this return :—(1) Changes of entry due to succession, partitions or simple mortgages, are not really transfers and should be excluded from the table, as also should redemptions of mortgage. (2) All temporary transfers, such as leases, should also be excluded, but mortgage with possession should be treated as a transfer and entered in the table. (3) All transfers made by order of a court should also be included in the table. (4) The word "court" in the entry "by order of court" should be held to include a revenue court.

(a) *Mysore.*—Only permanent transfers are included as by sale or gift, in which the parties concerned apply for and obtain transfers of revenue registry in the village accounts from which the table is compiled. Thus, changes of registry under orders of civil and revenue courts as well as those effected in consequence of the sale of land for arrears of Government revenue are included.

(b) *Alwar.*—Transfers by mortgage with possession, sale, and gift, both of proprietary and of occupancy rights, whether by order of court or by private contract, are shown in this table. Property confiscated by order of a criminal court, and holdings transferred by order of a civil or revenue court in satisfaction of money decrees or arrears of land revenue respectively are thus included.
